

Voltaro (VOLT) - Whitepaper

1. Introduction

Voltaro is a community-driven cryptocurrency launched on the Binance Smart Chain (BSC). It aims to decentralize energy use and empower Web3 financial independence.

2. Technology

Voltaro is a BEP-20 token on BSC. It offers fast transactions, low fees, and full compatibility with EVM-based platforms. Smart contracts are open source and verifiable.

3. Tokenomics

Total Supply: 1,000,000 VOLT

- 50% Liquidity Pool
- 20% Community Rewards
- 15% Development
- 10% Marketing
- 5% Reserve

4. Roadmap

Q3 2025: Launch, Airdrop, PancakeSwap listing

Q4 2025: CoinGecko & CoinMarketCap listing, Marketing

Q1 2026: NFT Platform, DAO setup

Q2 2026: Voltaro DApp Release

5. Governance

Voltaro plans to evolve into a DAO where holders vote on project proposals and development directions.

6. Security

Voltaro contracts will be audited. Liquidity will be locked and wallets transparently tracked.

7. Conclusion

Voltaro aims to become a leader in decentralized finance and blockchain-powered innovation.
